INTRODUCTION

Detail-oriented Computer Science student specializing in backend and full-stack development. Proven experience building and deploying practical applications, from AI-driven mobile tools (Flutter, PyTorch) to web-based logistics systems (Laravel, Flask).

WORK EXPERIENCE

Full Stack Web Developer Intern – Lamina Studios LLC.

July – August 2025

Developed and deployed full stack systems integrating AI-driven microservices and web infrastructure.

- **Developed and integrated a geospatial microservice** (Flask, RESTful API) to calculate real-time warehouse proximity, enabling dynamic alerts on a Laravel-based logistics dashboard.
- **Managed full-stack deployment** of the Laravel application on both Windows Server (IIS) and Ubuntu (LAMP) stacks, handling virtualization (VirtualBox), SSL setup, firewall/SSH hardening, and system service management.
- **Authored comprehensive technical documentation**, including deployment guides and validation reports, to ensure successful system integration and demonstrate network accessibility.

PROJECTS

Cataract Maturity Tool – Mobile App

2025

- Developed a functional mobile app for cataract maturity classification using Flutter, custom API hosted on Hugging Face Space, and linked firebase for real-time data synchronization.
- Integrated two deep learning models: one for cataract validation and one MobileViT-based custom model for maturity classification.
- **Tools:** Flutter, Dart, Android Studio, Hugging Face Spaces, PyTorch, Firebase

Order Processing Management Site

2025

- Contributed to a Laravel-based web system with user authentication and RBAC.
- **Tools & Technologies:** Laravel 12, SQLite, Spatie Permissions

Cybersecurity Game - Phishing Please

2024

- Developed and deployed a live phishing-awareness game with complete scene flow, gameplay mechanics, and backend logic.
- Conducted testing and iterative refinements to ensure stable production performance.
- **Tools:** Unity, C#

Meal Planner

2024

- Developed a Java-based meal planning application in NetBeans with a friendly user experience and interface.
- Implemented dynamic programming to generate optimal food combinations.
- **Tools:** Java, NetBeans

Database Management System

2023

- Implemented a CRUD based system simulating a visa application.
- Designed a relational database schema and implemented core backend operations.
- **Utilized:** Java, NetBeans, MySQL

Flight Reservation Plan

2022

- Developed a CLI-based seat reservation system using plain text file storage.
- **Technologies:** C

EDUCATION

Polytechnic University of the Philippines - Manila

Sep 2022 - Present

BS in Computer Science

- *GWA – 1.44, Consistent academic achiever*

CERTIFICATIONS

Fortinet Certified Fundamentals Cybersecurity - *January 2025*

Fortinet Certified Associate Cybersecurity - *January 2025*

CISCO Introduction to Cybersecurity - *June 2025*

CISCO Networking Basics – *October 2025*

SKILLS & INTEREST

- **Languages:** Python, Java, C#, C, PHP, Dart, SQL
- **Frameworks & Platforms:** Laravel, Flutter, Unity, PyTorch, Firebase, Hugging Face Spaces
- **Tools & DevOps:** Git, VirtualBox, LAMP, Android Studio, NetBeans, Render
- **Interests:** Backend development, UX Design, Gaming, Music and Films.
